## A Scalable DCEL implementation

Andres Calderon

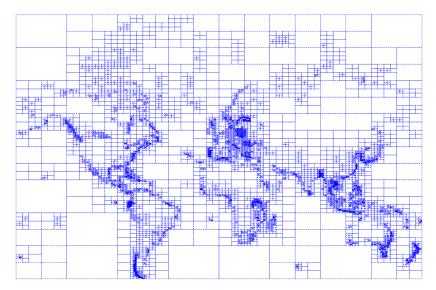

University of California, Riverside

July 24, 2020

## gadm dataset

- ▶ Level 1 (States) and level 2 (Counties) globally.
- ▶ 110K and 170K polygons.
- ▶ 1.0G and 1.2G.

## ${\bf Cells}$

## DCEL construction

- ▶ Partitioning (12583 cells) in  $\approx$ 121s.
- ▶ 37.6M (level 1) and 54M (level 2) edges processed.
- ▶ DCEL A in  $\approx 123$ s.
- ▶ DCEL B in  $\approx 132$ s.
